

AYUSHI SHIV

Senior Software Development Engineer – Payments & Distributed Systems

 ayushishiv1996@gmail.com |  +91-7987556761 |  [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with **6+ years of experience** building and scaling **high-throughput payment systems**. Expertise in **distributed systems, microservices, and payment gateway integrations**, with proven impact in improving reliability (70% → 98%), reducing latency, and optimizing operational cost through automation. Strong hands-on experience in **Go, Java, and cloud-native architectures**.

TECHNICAL SKILLS

Languages: Go, Java, C#, JavaScript

LLM: Claude code, Cursor, Github Copilot, ChatGpt

Backend: Microservices, gRPC, REST APIs, Spring Boot, Event-Driven Systems

Data & Storage: MySQL, DynamoDB, MongoDB, ElasticSearch, Redis

Messaging: Kafka, RabbitMQ, AWS SQS/SNS

Cloud & Infra: AWS (EC2, S3, Lambda, IAM), Docker, Kubernetes

Observability: Prometheus, Grafana, ELK

Core Concepts: High Availability, Circuit Breakers, Retry, Idempotency, Sharding

PROFESSIONAL EXPERIENCE

Swiggy | Software Development Engineer II | Sept 2021 – Present

Payments & Platform Engineering

- Architected **PayWithQR** solution reducing COD dependency via real-time QR validation and fraud checks
- Led integration of **8+ payment gateways**, designing scalable adapters handling **100K+ daily transactions** with **<500ms p99 latency**
- Delivered **Swiggy Money wallet migration (2M+ users)** with zero fund loss and robust rollback mechanisms
- Built **Cred Coins integration**, collaborating cross-functionally for seamless checkout experience

Reliability & Performance

- Designed **refund retry system** (retry + circuit breaker + idempotency) improving success rate **70% → 98%**, handling **50K+ refunds/day**, reducing manual effort by **85%**
- Optimized offer engine with **Redis caching**, reducing latency by **60% during peak traffic**

- Implemented **observability dashboards (Prometheus + Grafana)** with SLA tracking and automated alerting

Engineering Excellence

- Reduced CI pipeline execution time **~50% (55 min → <25 min)** via parallelization
- Increased test coverage **45% → 85%** through automated testing frameworks
- Mentored **5+ engineers** on system design, payment flows, and production readiness

Tech: Claude code, Cursor, Go, Java, Spring Boot, DynamoDB, MySQL, Redis, Kafka, gRPC, AWS

Myntra (Flipkart) | Software Development Engineer I Sept 2019 – Sept 2021

Payments & Financial Systems

- Redesigned **paisa apportioning algorithm** improving refund accuracy and reducing disputes by **40%**
- Built **multi-wallet refund retry system** (DLQ + idempotency) improving success **65% → 98%**, eliminating **15K+ manual refunds/month**
- Implemented **circuit breakers and fallback mechanisms** improving resilience during partner outages
- Integrated **3+ payment gateways** with standardized adapters
- Optimized bank offer ingestion pipeline (**4 hrs → 15 mins**) via parallel processing
- Owned features end-to-end (design → production → on-call)
- Reduced **mean time to detect by 45%** via improved logging and alerting

Tech: Go, Java, Spring, MySQL, MongoDB, Elasticsearch, gRPC

CarWale (CarTrade Tech) | Software Developer June 2018 – Sept 2019

- Built **8+ microservices** including auth, payments, offers, and user systems
- Designed **REST & gRPC APIs** for scalable inter-service communication
- Developed **React-based frontend** with optimized state management
- Designed **DB schemas & ES indices** achieving **sub-100ms query latency**

Tech: C#, .NET Core, MySQL, Elasticsearch, React

Amazon | SDE Intern May 2017 – July 2017

- Built **event processing pipeline using SQS & SNS** with encryption
- Refactored monolithic listener into **independent microservice**
- Achieved **90% test coverage** with unit + integration tests

KEY IMPACT

- Improved payment success rate **70%** → **98%** using retry + resilience patterns
- Reduced latency by **60%** via caching optimization
- Migrated **2M+ users** with zero financial discrepancy
- Eliminated **15K+ monthly manual operations** through automation
- Integrated **10+ payment gateways** at scale

EDUCATION

B.Tech – Computer Science & Engineering MANIT Bhopal | 2014–2018 | CGPA: 8.59
